Click on CameraFi Live and download it after choosing CameraFi Live click on install to download it. This may take a few minutes. It will be installed automatically. 6. Go to my apps and click on CameraFi Live to choose and open by clicking CameraFi Live in my apps to run it and use CameraFi Live for pc. Read also: Net Eye Camera for Windows and Mac posted at 17:43h in a blog by Hi Camera. this is cameraFi Live team. According to Facebook 20.2 platform policy, CameraFi Live cannot use the Facebook Live API to enable the mobile camera to broadcast live to Facebook. You can stream live on Facebook by linking webcams or other external cameras or other video sources. For more information on Facebook platform policy, please refer to the Facebook Platform Policy (Live API 20.2). – however, you can stream with your smartphone camera if you are using a custom RTMP stream. From now on, I will tell you to broadcast what your smartphone camera takes on Facebook using the custom RTMP streaming. You need a laptop (or computer) and a smartphone. #1. Click the Live Video/Live menu in the top publishing menu. You can stream on your Facebook/Channel/Group timeline. (Facebook Timeline) (Facebook Channel) (Facebook Group) #2. Choose to connect between two options (camera, connection). (Laptop). #3. Copy the server URL and stream key, and then send it to your messenger (e.g. WhatsApp, Messenger). Here's a tip! Check using a continuous stream key and you don't need to change the stream key for each stream. #4. Now, let's open CameraFi Live and choose the custom RTMP tap on the first page. #5. Write the server URL and the stream key you sent in the #3 process. #6. Click the GO button in CameraFi Live and you can see the preview view on your laptop. #7. Make the video title and tags and click the Go Live button at the bottom right. That's it! It sounds complicated, but once you're done, you can start #5 in the next broadcast. [Notice] The solution of the Facebook issue is now resolving the Facebook issue. You can stream live on Facebook with CameraFi Live now. Sorry for the inconvenience you may be experiencing because of the error. The app was temporarily disabled due to misunderstandings during the app review process for Facebook. Because of the Christmas holiday, it takes longer than we... Lisa was expected to communicate with them. I apologize for the late call. We did our best, but there were a lot of inquiries for us to cover. For anyone whose videos have been deleted, can you tell me where to broadcast, your diary, group or page? If you're streaming on your diary, can you also tell us if you choose CameraFi Live and remove them in Settings - Business Integrations by checking to delete posts, photos and videos as well..? Please reply to the post. We do our best to provide a stable application. Posted at 17:27h in a blog by hello camerafi2. This is cameraFi Live team. Did you know that we tested live streaming on Facebook using CameraFi Live? Are you wondering how you can stream live on Facebook with CameraFi Live? You need a laptop (or computer) and a smartphone. #0. Before you do this, you must check your Facebook page. #1. Sign in to the Facebook page and select deployment tools in the top navigation bar. #2. In the right menu, click live video options in the videos section. #3. Click the 'Create' button to start configuring your live publication. #4. Open CameraFi Live in your smartphone. #5. Click on the left menu in CameraFi Live and uncut to WOWZA. #6. Type the server URL and stream key as you can see on your laptop after #3 process. (Tip: If you're using hangout or gmail, you can easily copy and paste the long foreign letters of the server URL and stream key #9 #7. It sounds complicated, but if you follow these steps, you can do this!! It was disabled due to a misunderstanding during the app review process on Facebook. Because of the Christmas holiday, it takes longer than we... Mehr expected to communicate with them. I apologize for the late call. We did our best, but there were a lot of inquiries for us to cover. For anyone whose videos have been deleted, can you tell me where to broadcast, your diary, group or page? If you're streaming on your diary, can you also tell us if you choose CameraFi Live and remove them in Settings - Business Integrations by checking to delete posts, photos and videos as well..? Please reply to the post. We do our best to provide a stable app. Thank you. DomoStream is a streaming card designed to connect any device with HDMI output to your Android phone and live stream on Facebook, YouTube, or log to your phone (using CameraFi Live app), thanks to USB Output 3.0 you can connect the stream domo on your computer or Mac and stream to Facebook or YouTube as if you are connected to a webcam. Here's a short video on touch and run domo stream. Domo Stream recognizes any video device with HDMI greeting, in case dSLRs you should check in your user manual how to disable display indicators, since Domo Stream will receive all that information if it is not disabled, in case video cameras usually send all video signal clean, box contents: Domo mini cable stream card HDMI to HDMI USB adapter C Micro USB handle adapter with shoe guide what you have to know about the compatibility of your domo HERE STREAM cameras
